Horizon FD85 - YACHT OF THE YEAR 2018 in Taiwan

Horizon FD85 – Cutting-Edge Design and Flexible Performance

Featuring the new High Performance Piercing Bow (HPPB), the Horizon FD85 fast displacement motoryacht is at the forefront of innovation in her class, offering highly flexible cruising speeds combined with cutting-edge designs inside and out. While alternative bow designs that feature protrusions work more efficiently at either high or slower speeds, the HPPB brings both efficiency at slower speeds and performance at higher speeds. She saw across-the-board hydrodynamic improvements in both tank and CFD testing during the design stage.

Taiwan SNAME

Contemporary style lines and a 25% increase in interior spaces sets the Horizon FD85 apart among her competition. Horizon's designers configured 5 en suite guest staterooms; two crew staterooms with mess; seven heads; a main salon plus formal dining; and a private galley within her 23'3" beam. The unique, large-scale floor-to-ceiling windows bring in an abundance of natural sunlight and allow guests to indulge themselves with a view without going outdoors. This design is seen throughout the main deck level through to the voluminous on-deck Master – a feature not usually seen on a yacht of this size.

Outdoor entertaining is one of the core elements of the FD85's design, opening up a realm of all fresco possibilities. Between the aft deck, flybridge and forward bow, owners and guests can relax on the sunpads, lounge with a cocktail from the bar or dish from the grill, or simply take in the view. A true oasis on the sea, the Horizon FD85 redefines what it means to sit back, relax and enjoy the journey.
