

# Aquasense 33 Hybrid-YACHT OF THE YEAR 2019 in Taiwan

Taiwan SNAME

Aquasense 33 was jointly designed by TC Yachts, and commissioned by a high-end resort hotel chain to cater to visitors' needs for water transport among the islands. The model is a purely hand-made stateroom style top-end classical speed boat, with a rounded and refined silhouette, and the typical Mediterranean colors added to the relaxed and serene beauty of the ship, allowing it to exude elegance at every corner. We launched hybrid version in 2019.

## Introduction

- Electric speed 7knot – 30min
- 15kW non-diesel pure electric AC hotel supply
- Plug-in fast charge 1.5 hours
- Highly integrated full automatic control
- Smart Power management system
- Dual direction DC/AC inverter
- Modern Electric Vehicle Grade equipment
- Germany made mechanical part
- Japan Light weight common rail diesel engine
- Taiwan EV lithium ion battery and flywheel motor
- Maximize motor and engine performance
- Decrease fuel consumption
- Protect your environment
